

**Job Title:** Junior Electrical/Electronic Engineer  
**Industry:** Engineering, Oil & Gas  
**Location:** Warrington, Liverpool, Manchester, Cheshire  
**Rate:** £22K - £26K depending on experience  
**Job Type:** Permanent  
**Start Date:** ASAP

Sonomatic are looking to recruit a Junior Electrical/Electronic Engineer with a higher education qualification and about 1 years industry experience to join their engineering team.

Sonomatic specialise in the design and development of automated equipment for the manipulation of ultrasonic probes in support of their worldwide NDT field service division. Projects range from ROV deployed subsea inspection equipment and topside remotely operated inspection equipment to manually operated scanners. The working environment is both exciting and satisfying with new challenges every day.

The position will suit an individual with an Electrical/Electronic Degree or college qualification with good experience and a good knowledge of electrical/electronic design.

The right candidate will have some experience of analogue & digital design, working with test equipment, electrical/electronic assembly, microcontroller programming, schematic capture, specifying and sourcing components.

The suitable candidate will be based in the Warrington office, supporting the design team with product and prototype design activities, testing and approving of prototypes and investigating design related problems having a bias towards electronic design.

Candidates should have a good appreciation of electrical/electronic engineering and be confident in using a PCB design package.

**Benefits:**

Successful candidates will be offered an attractive benefits package.
